

TAROX

FOREWORD

TAROX performance brake pads are sold only in axle sets. Each part number comprises of a 4 digit code - this designates the correct fitment - and at the end of the part number a suffix is attached to determine the pad compound. e.g. 0459.112 - for Strada fast road pads to fit a Audi 4.

Below is a list of the pad compound suffix

.112	Strada	Fast Road
.114	Corsa	Road and Track
.116	Competizione	Race

Strada (.112) Pads are available for most applications listed in this catalogue.

Corsa (.114) Pads are available for most high performance vehicles.

Competizione (.116) Pads are available for selected high performance and race cars.

The same brake pad shape may be used for different cars with diverse performance. In our strive to ensure the best customer satisfaction, TAROX reserves the right to offer for sale the brake pads featuring the compound it deems most suitable for the application concerned.

It is not always possible to supply a wear indicator on performance pads. If supplied, it is only as a courtesy. If a wear indicator is required, it is often possible to transfer the existing indicator from the replaced pads. TAROX strongly recommends that customers regularly check brake pad and disc wear.

BEDDING IN GUIDELINES:

Road Use

TAROX road pads should be run in for a period of between 250km and 300km - longer maybe needed if not mated to new discs - with short smooth braking action. Sharp or heavy braking in the early stages can cause overheating of both the pad and disc which will cause the pad to 'glaze'. This will compromise braking performance.

Competition Use

For TAROX race pads we advise 20 - 30 brake applications not at full race speed while applying half pressure on the brake pedal. Stop the car check the brake discs; The surface of the brake discs should show light colouring over the full pad area. Repeat the procedure 3 - 4 times each time with increased speed. At the end of procedure brake pads should be ready to race.

NOTES:

Orders are accepted according to the terms and conditions of sale which are listed at the back of this catalogue.

TAROX have provided as much information as possible relating to each individual part number and application. The specifications, technical illustrations and O.E caliper information are listed to enable you to supply the correct pad for your customer.

Part numbers, vehicle models and engine details change from time to time and although the information contained in this catalogue is, to the best of our knowledge, accurate at the time of compilation and publication, TAROX, its resellers, agents and distributors will not take responsibility for any cost in connection with fitting problems including - but not limited to - labour charges.

INTRODUZIONE

Una serie pastiglie freno TAROX comprende le pastiglie necessarie per equipaggiare l'asse di un veicolo. Ciascun codice TAROX e' composto da 4 numeri - che identifica l'applicazione - e un suffisso che determina il tipo di mescola. Per esempio: 0459.112 pastiglie stradali sportive per Audi A4.

I tipi di mescola disponibili sono elencati di seguito.

.112	Strada	Uso Stradale
.114	Corsa	Uso Stradale/ Track day
.116	Competizione	Prevalente uso in pista

Le pastiglie in mescola 112 (Strada) sono disponibili per la maggior parte delle applicazioni a catalogo.

Le pastiglie in mescola 114 (Corsa) sono disponibili per la maggior parte delle vetture ad alte prestazioni a catalogo.

Le pastiglie in mescola 116 (Competizione) sono disponibili per quelle vetture ad alte prestazioni per cui e' previsto l'uso prevalente in pista.

La stessa sagoma di pastiglie puo essere utilizzata su vetture diverse per rapporto peso/potenza. Al fine di assicurare la piena soddisfazione del cliente TAROX si riserva il diritto di fornire il tipo di mescola piu' indicato per il tipo di vettura sulla quale le pastiglie verranno utilizzate.

Dato la natura "aftermarket" delle pastiglie TAROX, non e' possibile assicurare la presenza dei sensori di usura delle pastiglie che, quando presenti, sono da considerarsi un servizio di cortesia per il cliente. I sensori di usura possono essere comunque recuperati dalle pastiglie da sostituire. In ogni caso TAROX raccomanda di controllare in periodicamente lo stato di usura dei dischi e delle pastiglie freno.

CONSIGLI PER IL RODAGGIO:

Uso stradale

TAROX consiglia di rodare le pastiglie per i primi 250-300 km - un po' di piu' se si sostituiscono anche i dischi freno applicando in sul pedale colpi brevi ma decisi. Soprattutto durante il rodaggio, si raccomanda di evitare frenate brusche o/o prolungate che possono surriscaldare i componenti dell'impianto, spesso causa della vetrificazione della pastiglia che puo' comportare la perdita di efficacia dell'impianto frenante.

Uso in competizione

Per le pastiglie per uso in gara si raccomanda di effettuare 20-30 frenate a meta' corsa del pedale a velocita' moderata. Fermare la vettura e controllare dischi e pastiglie: la pista frenante dovrebbe presentare un lieve colorito uniforme sulla superficie di contatto con la pastiglia. Ripetere la procedura 3-4 volte a velocita' crescente. Alla fine del ciclo di rodaggio le pastiglie dovrebbero essere pronte per l'uso in competizione.

NOTE:

Tutti i prodotti TAROX sono venduti in conformita' alle Condizioni Generali di Vendita elencate in fondo a questo catalogo. Per ciascuna applicazione contenuta in questo catalogo si sono raccolte tutte le informazioni disponibili da una pluralita' di fonti. Le informazioni sugli impianti frenanti originali, specifiche tecniche e disegni illustrativi hanno lo scopo di mettere in grado il cliente e/o il rivenditore di identificare in modo corretto ed ordinare i componenti per la propria vettura.

Le specifiche dei veicoli in commercio, gli allestimenti, le dotazioni tecniche sono soggette a continui cambiamenti e, sebbene siano stati compiuti tutti gli sforzi per verificare l'accuratezza delle informazioni quivi riportate al momento della pubblicazione, TAROX - non accetta alcuna responsabilita' in relazione a qualsiasi costo sostenuto dal cliente a causa di uno o piu' componenti non idonei, incluso - ma non limitato a - spese di manodopera.

Le illustrazioni tecniche delle pastiglie TAROX sono disponibili sul link: www.tarox.com/docs/sagomario
